Global, Sustainable, and Cost-Effective Solutions

A futuristic background image for the Technological Center featuring a blue-toned scene with a robotic arm, glowing molecular structures, and a hand interacting with a digital interface.

TECHNOLOGICAL
CENTER

A background image for the Control Laboratory showing a scientist in a white lab coat and safety glasses using a pipette in a laboratory setting, with a microscope and various lab equipment visible.

CONTROL
LABORATORY

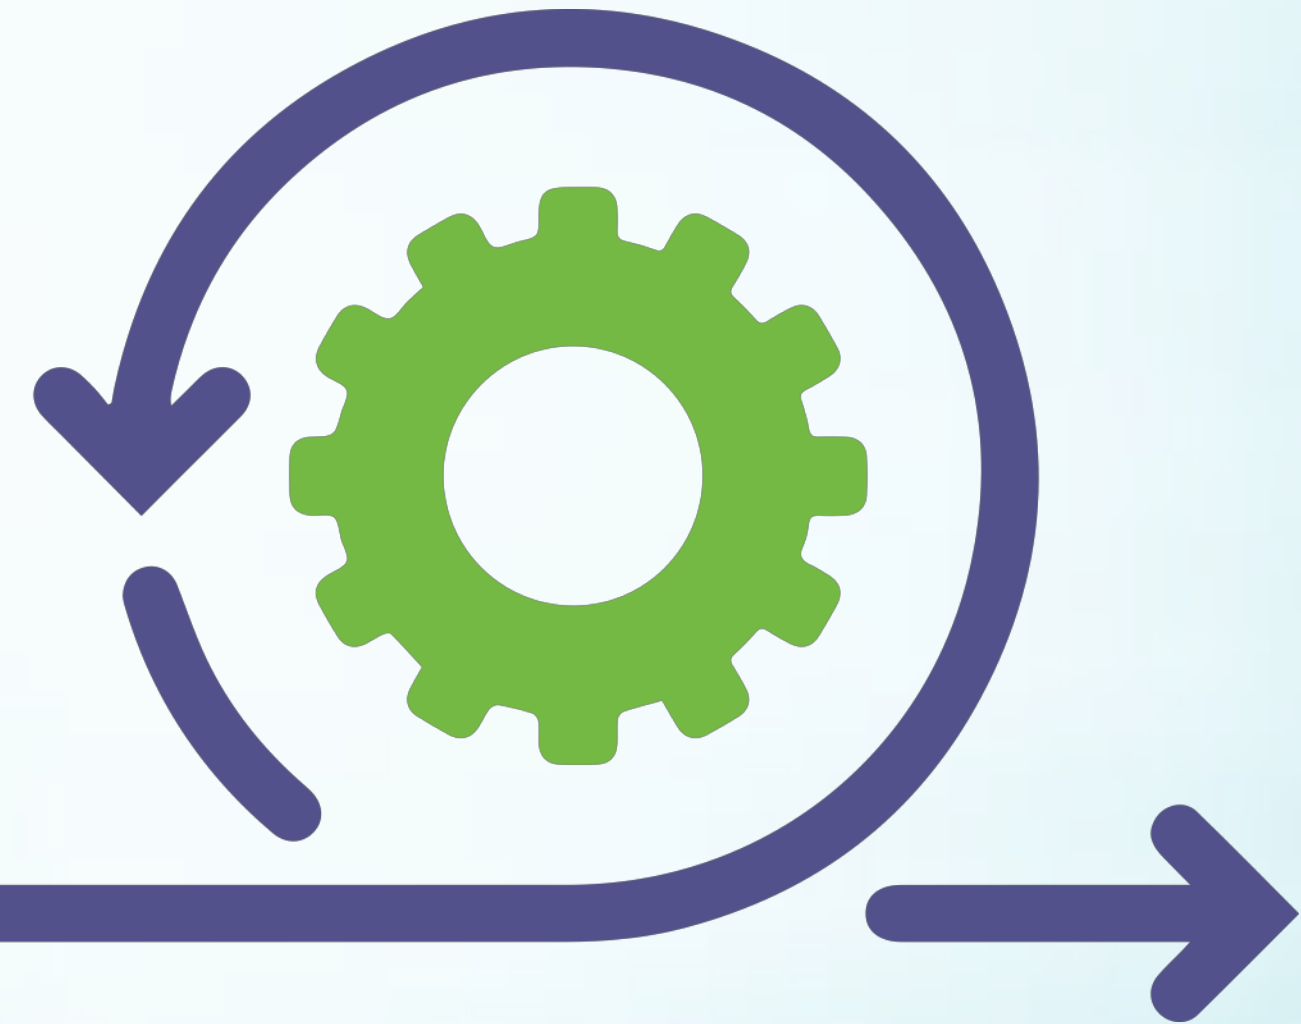

A background image for Specialized Consulting showing a person's hands writing on a document with a pen, with a colorful bar chart visible in the foreground.

SPECIALIZED
CONSULTING

A background image for Inspection and Control featuring a woman wearing a yellow hard hat and safety glasses, holding a clipboard and looking towards the camera in an industrial setting.

INSPECTION AND
CONTROL

SYNCHRONIZED TECHNOLOGY AND KNOWLEDGE

AGQ Labs is a technology center for analytical testing with over 30 years of experience in advanced testing and specialized chemical engineering.

We synchronize technology and knowledge, offering valuable solutions and services to the agriculture, food, consumer goods, water cycle, life sciences, industry, energy, and mining industries.

SERVICES

AGRICULTURE PROFITABLE AND SUSTAINABLE

Our Clients

- Agricultural Producers
- Manufacturers and distributors of agricultural inputs
- Green areas
- Industrial Hemp

- **Analysis**
Soil, foliar, fertilizer, irrigation water, root reserves, nutritional maps GIS-NDVI, and post-harvest quality
- **Integral Agronomic Consultancy**
- **Crop Nutritional Monitoring Patented**
- **Food Safety and Quality of Agricultural Products**
Pesticides, heavy metals, microbiology, mycotoxins, degradation curves, and nutritional labeling.
- **Environmental Control**
Wastewater, sludge, and leachates.
- **Evaluation and Technical due Diligence of Agricultural Projects**

FOOD SAFETY AND QUALITY

Our Clients

- Seafood
- Processed food
- Commercial Catering
- Distribution and Retailer of Bottled Water and Beverages
- Animal Feed
- IV, V, and VI range
- Coffee and Cocoa
- Tea, Infusions, and Aromatic Herbs
- Green and Cured Tobacco
- Meat Products
- Dairy Products
- Cereals
- Legumes
- Nuts and Dried Fruits
- Snacks
- Baked Goods
- Pastries
- Honey and Derivatives

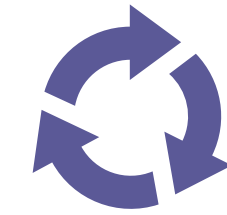

- Food Safety and Quality Analysis
- Food Studies
- On-site Inspection and Analysis
- Environmental Control
- Hygiene and Safety
- FDA Detentions
- Supplier Control at Origin and Destination

QUALITY AND CONTROL OF THE WATER CYCLE

Our Clients

- Water Cycle Management
- Construction and Engineering
- Transportation Facilities
- Drinking Water Treatment Plants

Analysis and consulting for integral water cycle companies, from its collection in nature to its treatment, use, purification, and safe reintegration into the environment.

● Analytical Services

Waste, drinking, inland, and marine waters. Covid-19 and radioactivity in water. Waste, atmosphere, noise, and legionella.

● Sampling Services

Inspection and control, environmental monitoring, and characterizations.

ENVIRONMENTAL SOLUTIONS FOR THE INDUSTRY

Our Clients

- Cement
- Metallurgy and Iron/Steel
- Automotive and Aeronautics
- Ports and Airports
- Chemicals
- Pulp, Paper, and Wood
- Food Industry Waste Management and Treatment

Environmental controls and services for companies and industries according to current sustainability regulations and principles.

Analytical services and specialized environmental consulting for each company and industry.

● Analytical Services

Water, waste, atmosphere, noise, soil, PCBs, metal speciation, environmental radioactivity, radon, and legionella.

● Sampling Services

Inspection and control, environmental monitoring, and characterizations.

ENERGY, GAS, AND PETROLEUM, PRODUCTION MANAGEMENT

Our Clients

- Oil and Gas Extraction, Refining, and Transportation
- Electricity Generation
- Solar and Photovoltaic
- Hydraulic
- Biofuels
- Nuclear

The energy, gas, and petrochemical industries need specific environmental solutions to ensure the control and sustainability of their production.

- **Analytical Services**
PCBs, hydrobiology, metal speciation, ballast water, air quality, waste, soil, water, atmosphere, and noise.
- **Sampling Services**
Inspection and control, environmental monitoring, and characterizations.

MINING EFFICIENCY AND SUSTAINABILITY

Our Clients

- Geological Exploration
- Mining and Metallurgical Exploration Projects
- Mining Waste and Liabilitie

- Chemical Analysis
- Metallurgy and Mineralogy
- Treatment and Valorization of Mining Effluents
- Outsourcing
- Environmental Consulting
- Environmental Geochemistry

CONSUMER GOODS, SAFETY IN OUR ENVIRONMENT

Our Clients

- Toys and School Supplies
- Cleaning and Disinfection Products
- Food Packaging
- Industrial Hygiene and Safety

- Physical-mechanical tests. Standard EN-71
- Chemical Tests
- Analysis of Disinfectants: Composition and Richness
- Bactericidal and Virucidal Efficacy
- Metal Migration
- Contaminants: monomers, phthalates, residual solvents, etc.

LIFE SCIENCES

Our Clients

- Health Care Products
- Human and Veterinary Pharmacology
- Supplements and Sports Nutrition

- Physicochemical Analysis
- Microbiology
- Contaminants and Mutagenic Substances
- Method Development and Validation
- Stability Studies
- Process Control: water, air, and product
